

Assembly instructions for Sound panel installation

STEP 1:

Always handle the acoustic panels with protective gloves as they soil easily.

STEP 2:

Screw the acoustic panel anchors into panel until they are flush. Ensure they are placed at even distances to enable the panel to hang level. (See diagram A)

STEP 3: Unscrew the ceiling mount section and attach this to the ceiling using appropriate fixings for your ceiling material. Screw the hanging wire back on to the ceiling mount.

STEP 4: Adjust the hanging wire hook by pressing the release button on the back of the hook component. Pull the wire whilst pressing the release button as shown.

This enables you to adjust the hanging distance of each wire to position the acoustic panels in your desired location.
